The directors and staff at Browns of Wem would like to wish you all a happy and prosperous New Year

Timber Stables, ready for winter

Past, Present & Future

Future Projects

This is the time to start giving serious consideration to next year's projects in particular those needing completion during the summer months.

Full planning applications usually take a minimum of 8 weeks however should the planners impose conditions this could extend the process. Our dedicated planning department has a 99% success rate and can guide you every step of the way as agents for your planning application.

Browns of Wem Ltd prides itself on being a family run business and are one of the few companies that offer both steel and timber framed buildings from its manufacturing site in North Shropshire.

History

Mr Brown spent most of his entrepreneurial life dealing, buying and selling, alongside his farming operations. He married in 1941 and he and Mrs Brown started trading from the small holding at Four Lane Ends, Whixall just after the Second World War. He bought and dismantled air raid shelters from the big cities, brought them back and converted them into small farm buildings for reselling at local markets.

The business, then known as Browns of Whixall, grew enormously in the late 1950's and 60's supplying timber poultry sheds. There were over 200 employees and a fleet of 15 lorries. In the mid 1960's the first steel fabrication shop was built and steel framed buildings started to roll off the production line. In those days all materials and sheeting came through the yard and the major challenge suppliers faced was finding us. The company name was changed and **Browns of Wem Ltd** came into being.
