Dairy Day – Telford International Centre, stand H111

Welcome to our latest Newsletter.

In this issue we are focusing on our steel framed agricultural buildings, with their sturdy and versatile construction our steel buildings can be used for all types of agricultural purposes including livestock, machinery, crop storage and general purpose buildings.

We can provide a bespoke building to suit your requirements and available space, no matter how big or small Browns of Wem has the experience and expertise to fulfill your needs.

Catch up with our sales team Jonathan and Stephen who will look forward to meeting you.

Website News

We are delighted to announce our new website is now live and has more details on all types of buildings we can provide.

Buildings can be designed sympathetically to fit in with your surroundings and can be used to house any type of livestock. Steelwork can be supplied in a painted or galvanised finish. Most kinds of roof and side cladding options are available and all our buildings are supplied with rainwater goods as standard. We have the experience and expertise to work with your chosen internal contractor to help create the optimal solution for you and your animals needs.

Browns of Wem Ltd have been supplying, delivering and erecting agricultural buildings for over 70 years and pride ourselves on offering a bespoke design service to suit any agricultural requirement.
Our buildings provide quality, durability and added value for your business and are offered for technical advice and free site surveys.
Browns of Wem Ltd offer the best of modern materials and construction techniques to create the most durable and long lasting buildings for your business. For any type of agricultural building whether it be a barn, workshop or storage shed we have the expertise to deliver the best solution for your business.

Our crop storage buildings can be designed for any type of produce, Browns of Wem have proven solutions for safe and efficient handling and storage. You can be assured that the most up to date construction techniques are used in all of our buildings.

Our general purpose buildings can be used to provide a number of storage options including hay, straw and machinery and can be provided with gates, doors or just a clear opening. All of our buildings can be supplied with concrete panels if required.

Future Projects

Now is the time to plan ahead for your building requirements for next spring or summer.

Full planning applications usually take a minimum of 8 weeks however should the planners impose conditions this could extend the process. Our in-house planning department can guide you every step of the way supporting your own agent or acting directly for your planning application.

No project is too big or too small for us - including Grain and Crop Stores, Livestock Buildings and General Purpose Storage Buildings of any size.

Give our sales team a call today.
