

DESIGNED TO WORK...

... BUILT TO LAST

Aintree Loose Boxes

Our Aintree stable ranges are individually made so that the design, size and layout can accommodate your yard requirements.

Range options include:

Loose boxes	Tack rooms	Hay stores
Covered walkways	Washdown boxes	Garages

Construction

All boxes have a 22° roof pitch, central ridge and 4' front overhang for an attractive traditional look providing protection against the elements. Each range is solidly built from 3" x 2" planed timber framing with ¾" finished thickness shiplap exterior boards, pressure treated to protect against worm and rot.

Sections are pre-drilled and supplied with coach bolts for ease of assembly and subsequent dismantling if relocation is required. We provide all the necessary bolts for securing the building down to your brick wall base.

Roofing

The Aintree roof is designed to ensure good ventilation and a light, airy environment inside each box. Constructed of natural grey fibre cement roof sheets on solid timber purlins supported by load-bearing partitions, ventilation is provided by ridge vents while clear p.v.c. roof lights can be supplied at no extra cost to provide additional natural light into the boxes. Front and rear deepstyle guttering and rainwater pipes come as standard with Browns of Wem stables.

Doors & Windows

Each loose box has a 4' wide x 7'3" high overall frame stable door set comprising frame, top door, lined bottom door, heavy galvanised steel hinges, shootbolts, kick-over latches, anti-chew and bite strips. A 4' x 3' deep stable window is provided for each box with top opener for ventilation and a removable weldmesh guard for the lower section. Pony size doors are available on request.

Kickboard Lining

Solid timber kickboards comprising ¾" finished thickness square edged tongue and groove boarding to either 4' high or 7'6" high (rear eaves height) are available as an option throughout your range.

Range Size	Additional Units
10' x 12' (1No 10' box)	Corner Box - 16' x 12'
