

DESIGNED TO WORK...

... BUILT TO LAST

Burrbrook Workshop

Designed as a utility shed or store, the Burrbrook is easily adaptable to a number of different environments and roles. Often used as a garden or potting shed, other uses have included beach huts and workshops.

Traditional quality construction ensures that the building is weatherproof and secure making it an ideal addition to your property.

Construction

External sections are solidly built of 2"x2" timber framework clad with 3/4" finished thickness shiplap boarding with black membrane between framework and boarding. Shiplap is pressure treated to protect against worm and rot. Sections are securely bolted down to the base. Feather edge boarding is also available.

Roofing

Constructed of timber framework and decked with 3/4" t&g boarding, the roof is finished with 38kg green mineralised felt or Fibre Cement Sheeting as an alternative.

Doors & Windows

The standard Burrbrook has a hinged, ledged and braced timber door in the gable end clad in 3/4" V-jointed t&g boarding complete with galvanised T-hinges and rim lock, and a 2' deep strip window in one side complete with one top hung opening light.

Floor

3" x 2" timber framework clad with 3/4" square edged t&g floor boards form a substantial floor, well suited to storage or a workspace.

Standard Sizes

8' x 6' (2.4m x 1.8m)
10' x 6' (3m x 1.8m)
12' x 6' (3.6m x 1.8m)
8' x 8' (2.4m x 2.4m)
10' x 8' (3m x 2.4m)
