

DESIGNED TO WORK...

... BUILT TO LAST

Paramount Buildings

Handcrafted in timber, this classically designed building with its symmetrical proportions and adaptability will complement existing structures and other Browns of Wem buildings with ease. Suited to a wide range of uses it makes an excellent choice for grounds and equestrian settings.

Each building is made to your specification and layout requirements. We can provide the necessary elevation drawings for planning applications and base drawings for your builder. They can also be built to comply with a commercial standard when required.

Construction

External sections are solidly built of 4" x 2" nominal timber framework clad with 3/4" finished thickness pressure treated timber shiplap or rustic style 8" deep featheredge boarding. Optional internal partitions are constructed of similar framework and clad on one side to full height with 3/4" finished thickness square edged t&g boarding.

Roofing & Rainwater Goods

Maintenance-free and easy-to-handle Marley fibre cement roof sheets are used as standard, while rooflights can be supplied to provide natural light. Other roof cladding options are cedar shingles, insulated systems and felt tiles. We can also supply the building ready for traditional slates/tiles for fitting by your chosen contractor. Deepstyle pvc gutters to both front and rear eaves are included, complete with downpipes and shoes.

Fronts

The Paramount building is supplied as open fronted, front sections can be added and largely depend on the use for which the building is intended. Options include boarded fronts, general purpose fronts, stable fronts as well as log stores to gable ends.

Doors & Gates

We offer a range of doors and gates enabling you to optimise the internal layout of your building. These include hinged double doors, stable doors, sliding doors, timber field gates, steel stockyard and sheeted gates.
